

AdvantEdge Primary Belt Cleaner

- **BELT WIDTHS**

Belle Banne AdvantEdge cleaner is suitable for all belt widths from 400mm to 1800mm.

- **REVERSING CONVEYORS**

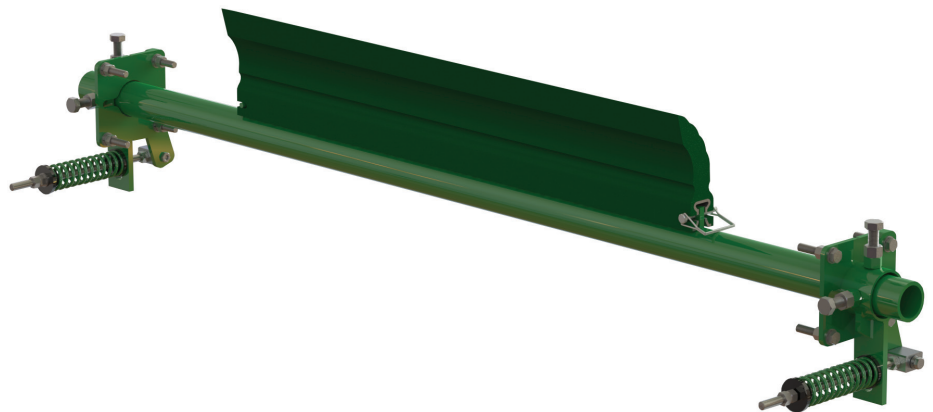

The Belle Banne AdvantEdge belt cleaner can be used on reversing belts. Install one at either end, or one at the primary discharge end of your conveyor.

- **MINIMAL MAINTENANCE**

Simple one pin blade change out and self adjusting side assemblies mean this cleaner requires low maintenance.

- **STAINLESS STEEL**

Belle Banne cleaners are available in either powder coated mild steel, or 304 stainless steel. 316 grade available on request.

FEATURES

- **COMPACT DESIGN**

Mounts easily in tight chute locations and the blade can be mounted in a range of locations.

- **THE ADVANTEDGE BLADE**

The unique "Bubble Back" profile creates a varying attack angle and maintains a sharp cleaning edge as the blade wears.

Our urethane formulation and hardness provides the cleaning power of a metal blade.

Blades are easily retro-fitted to other brand cleaners.

- **MINIMAL MAINTENANCE**

The AdvantEdge cleaner can be installed by the operator with ease.

The quick change blade system means blade replacement is fast and allows you to get back to running your belts.

The Belle Banne Advantedge primary belt cleaner is a simple, quick and effective cleaner.

Mounted on the head pulley, it features a single, long lasting urethane blade incorporating the patent-pending "Bubble Back" profile.

This profile ensures constant blade tension as the blade wears and uses more of the blade for cleaning than competitive brands.

The do it yourself maintenance results in fast blade change outs to ensure your conveyor belt stays running when you need it.

The Belle Banne Advantedge cleaner delivers effective cleaning without blowing your budget.

AdvantEdge Primary Belt Cleaner
