R Type Secondary Belt Cleaner

- **BELT WIDTHS**

Belle Banne R type belt cleaner is suitable for all belt widths from 400 mm – 3000 mm.

- **REVERSING CONVEYORS**

The Belle Banne R Type belt cleaner has been purposely designed for use on reversing conveyors. Install one at either end for maximum performance, or just one at the primary discharge end.

- **HEAVY DUTY CONSTRUCTION**

Belle Banne cleaner poles are the strongest around. All poles are schedule 80 material, ensuring they are fit for tough mining applications.

- **STAINLESS STEEL**

Belle Banne cleaners are available in either powder coated mild steel, or 304 stainless steel. 316 grade available on request.

FEATURES

- **SEGMENTED BLADES**

The R type belt cleaner consists of individual 150 mm segmented blades, each one mounted to a durable rubber cushion. Separate blades ensure constant blade to belt contact on uneven surfaces, guaranteeing maximum cleaning performance.

- **LONG LASTING TUNGSTEN**

Belle Banne has long been the leader in its class when it comes to tungsten. Our tungsten has a proven track record for consistent wear and long blade life. No other tungsten blade comes close.

- **SYMMETRICAL CUSHION DESIGN**

The R Types symmetrical cushion design ensures the R type tips meet the belt at 90 degrees to maximize cleaning performance regardless of the direction of travel of your conveyor. Optimally positioned off the head pulley, the Belle Banne R Type cleaner is a compact design allowing cleaned fines to return to the material flow.

The Belle Banne R type secondary belt cleaner has been a successful secondary cleaner for over 30 years. Designed for use in reversing applications, and teamed with a Belle Banne primary cleaner, or by itself, it has proved effective in maintaining a clean conveyor belt across diverse applications.

Ideally positioned just back from the head pulley, the Belle Banne R Type cleaner is compact enough to fit in most chute applications and sits close enough to the pulley to ensure the material fines are directed back into the regular material flow.

Available in all sizes to suit your belt width, and in a range of materials to optimize life and performance, the Belle Banne R type belt cleaner is a smart choice if you want to eliminate carry-back from your conveyor system.
